

# It Really Works!

If you are suffering cold floors, draughts and chilly feet then it might be time to consider the highly commended and leading PHCS SnuggerFLOOR underfloor insulation.

It starts from the bottom up. Heat rises so unless draughts underneath the home are addressed, there is always a likelihood of nippiness around the floors and in the air. PHCS SnuggerFLOOR provides you the opportunity to turn down the thermostat, reduce fuel bills and sit back in the comfort of a warmer and cosier home!

## PROBLEM – Reasons for cold and draughty floors

Free flow of air under the home is important for health and safety.

That same air can penetrate the floorboards in to the home causing unwelcome cold floors and draughts in the living space.

Turning up the thermostat is not only costly but the hot air rises, still leaving cold floors and uncomfortable chilly feet.

Standards for underfloor insulation were lower in park homes years ago. Traditional insulation materials degenerate over time. This all contributes to increased air gaps and reduced heat retention.

## SOLUTION - How the PHCS SnuggerFLOOR system works

PHCS SnuggerFLOOR is the only fully bonded and sealed underfloor insulation system.

Bonded and sealed, SnuggerFLOOR provides a complete additional layer under the home to eliminate air gaps and draughts, whilst still allowing for free air flow beneath.

PHCS never uses tape as a sealant. This is a short term fix due to loss of adhesion in a damp and dusty environment, with no insulation value.

SnuggerFLOOR materials, exclusive to PHCS, are of superior quality to ensure maximum insulation performance for lasting sustained duration.

SnuggerFLOOR does not deteriorate shrink, suffer moisture damage and is rodent resistant.

The design meets health and safety conditions, is Class 1 fire retardant, and allows for ease of access to pipes and wiring under the home.

# It REALLY Works!

“I had PHCS SnuggerFLOOR installed in July 2016. I thought it would be a good idea, especially if I could lower my fuel bill. I can say it absolutely works! I only have a gas fire in my lounge with radiators elsewhere. All through the winter months I hardly had the gas fire on. The whole house just stayed warm all the time. Plus happily I can report the gas bill has reduced!”

**Jenny Robinson,**  
Clearways Mobile Home Park

“The warmth is amazingly different! Before I had PHCS

SnuggerFLOOR I had a very cold backroom and cold draughts in the bedroom. Literally I could feel an immediate difference as the system was being fitted! Now the draughts have vanished. I don't have the heating on as high, or for so long, even in the colder spells. I even notice the noise reduction. Really pleased I had PHCS SnuggerFLOOR installed. You couldn't ask for a better team too, they are exceptional!”

**Heather Scarbro,**  
Stone Valley Court

## Group Presentations

Are you and some of your neighbours interested to find out more about PHCS SnuggerFLOOR?

Why not arrange for PHCS to visit you as a group on site? It will give you the opportunity to get to know PHCS and SnuggerFLOOR better, ask as many questions as you'd like, in the company of friends and neighbours. It's free too!

“At Broadway Park we are very careful which suppliers we liaise with. In 2015 we invited PHCS to do a group presentation about SnuggerFLOOR underfloor insulation. It was an ideal setting for our residents to meet PHCS and understand the SnuggerFLOOR system, without feeling any pressure. Since then we have many residents who are benefitting from the SnuggerFLOOR installation and continue to praise the services of PHCS”

**Graham Fripp, Park Manager**

Graham and Sandra Fripp

The PHCS team is both friendly and professional working to high standards. They are very experienced in all types of park homes. Always respectful of customer environment and work with minimum disruption.

As PHCS SnuggerFLOOR is bespoke to your home, PHCS always carries out a site visit to meet and chat with you in person, explain the system and check under your home. PHCS will always provide a written quotation prior to any works being undertaken.

PHCS is QICA certified and comes with a 10 year guarantee.
